CORPORATE HISTORY

Pacific Innovations Ltd. was registered in 2016 and intends to establish itself as a reputable Engineering Services Company in Zambia. In achieving all this, the management of the Company intends to establish a good working relationship with government Ministries and Departments such as Rural Electrification Authority, ZESCO, RDA and NRFA.

Pacific Innovations Ltd. was organized to be responsive to the emerging new technologies in Engineering Sector by constantly monitoring new products and services fitted to the needs of the customers, establish new product lines for value added services of the Clients.

In so doing, the company has also employed highly technical, well disciplined, trained, field tested and experienced manpower to handle all jobs with a professional's touch. The unending cross training among each of the experienced employees has further enriched the company's readiness to meet the demand of the future and readiness to serve the needs of its valued customers nationwide.

Pacific Innovations Ltd, in its mission to give clients total satisfaction, has employed a professional staff and support staff to upgrade their education. It handles the Construction of Roads both paved and bituminous, design, consultancy, building and construction of Bridges, installation and commissioning of Electricity Grid Extension Lines and Transformers, Network IT Security, radio Terminals, Multiplexers, Data com equipment, Inside and Outside Plant cables (Copper/Fiber Optics), Wire line installations (now Structured Cabling). It has a long record of accomplishments both in private and government entities including telecommunications.

BUSINESS

Pacific Innovations Ltd is serious about expanding and pursuing large-scale contracts in Zambia. As a result, we continue to recruit and invest time and money in our people. It is they who provide the foundation for our growth. Moreover, as the industry moves to alliance and joint venture contracting, we have forged strong working relationships with other well established and professional companies. Pacific Innovations Ltd continues to communicate its success, build its reputation and consolidate its brand values.

This is achieved by promoting our professionalism, project experience and technical capabilities through our regularly updated advertising, responding to requests for the supply of editorial content and by public information exercises. We also promote our commitment to the environment and the community - all of which serves to underscore the progress and pride we take in our work.

Safety is critical to our company. That is why we implement project-specific Occupational Health and Safety management plans. These are regularly audited, both internally and externally, and refined where necessary. We recognize the increased safety risks and hazards for workers in the civil construction industry. So our safety control measures are thoroughly and clearly communicated to all employees, subcontractors, and visitors on every project site, big and small.

We also acknowledge that achieving a high standard of occupational health and safety involves shared responsibilities and teamwork. Accordingly, the Company is committed to fostering the enthusiastic involvement of every employee, supervisor and manager through consultation, cooperation and participation. This is to ensure that practical Solutions to health and safety issues are achieved throughout our workplace. Pacific Innovations Ltd currently registered all employees with Work Men's Compensation Control Board.

CONCLUSION

To stand still in today's environment is to go backwards. That is why Pacific Innovations Ltd has adopted a policy similar to the Japanese philosophy of Kaizen, the notion of continuous improvement. This is born from three dimensions; learning from the past; Listening to the present; and anticipating, then preparing for the future.

Thus, the company seeks and welcomes feedback on all its projects. Ours is a business which exerts considerable energy learning and understanding our client's culture so that we can better meet their needs. And we will continually trawl the world of civil engineering both locally and globally, looking for, and developing new and better models to employ in fulfilling our obligations.
