Company Description

Ideal industries SARL is a company which helps organizations to optimize their chains of value. We cover a range of services for the mining sector, but also for any other industrial and commercial sector. Our support in both construction and mining engineering on one hand; and custom clearing & forwarding, logistics and transport on the other, aims to make local and international partner companies more productive. Carried by a team of young, passionate, creative, and innovative people, our quality management relies on the managerial skills and leadership of our managers who, beyond their expertise and professional experience, have an excellent knowledge of the above-mentioned fields of activity

Engineering and Customs clearance company working in the mining sector and infrastructure works in order to develop Africa. Our commitment is to support companies in their investment and exploitation projects.

Our Mission

To optimize the value chain process in the construction and mining industry.

Our Vision

To become a company of choice in the mining and construction sector.

Our Priority

To be available and to provide an excellent service while maintaining a high level of quality.

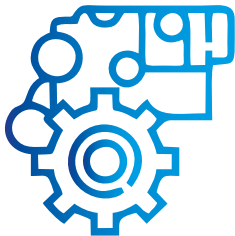

Civil engineering and construction

Our services cover all aspects of development - from investment and exploitation project studies to maintenance services through construction and rehabilitation of structures. A team of expert and motivated engineers is available to take care of your technical needs.

- **Construction and rehabilitation of structures (bridges, erosion control works, buildings, road, and industrial infrastructures, etc.)**
- **Construction of telecommunication pylons**
- **Drinking Water Supply**
- **Technical study office (design engineering, structural calculations, control, etc.)**
- **Construction Dewatering**

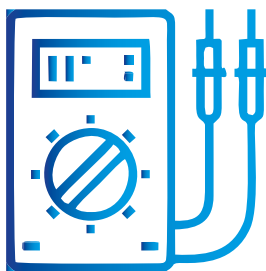

Mining Engineering

Our team also deals with activities related to the extraction of minerals from the earth. We support our partners in specializations such as Mine Design, Mine Planning, and Mineral Processing. That allows us to intervene at several project levels: Geology services, Resource & Reserve Estimation, Mine Design & Scheduling, Metallurgy & Process Design, Mining Studies, Mine Optimization, Financial Services, Corrosion protection (HDPE geomembrane, geosynthetic clay liners, AKS Anchor Button systems, Acidic bricks), HDPE Lines and pipes installation, etc. Our core services focus on three aspects:

- **Mine Technical Services**
- **Tailings Storage Facilities construction (Earthworks)**
- **Mine Environmental solutions**

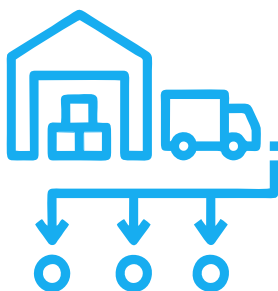

Electrical and instrumentation services

We are keeping up equipment, process and services by making everything functional on a daily basis since everything mostly operates 24/7, 365 days of the year. A team of experts provides a good service in troubleshooting, repairing and maintaining the various parts needed to keep a treatment plant running smoothly and effectively. Below are some services Offered: :

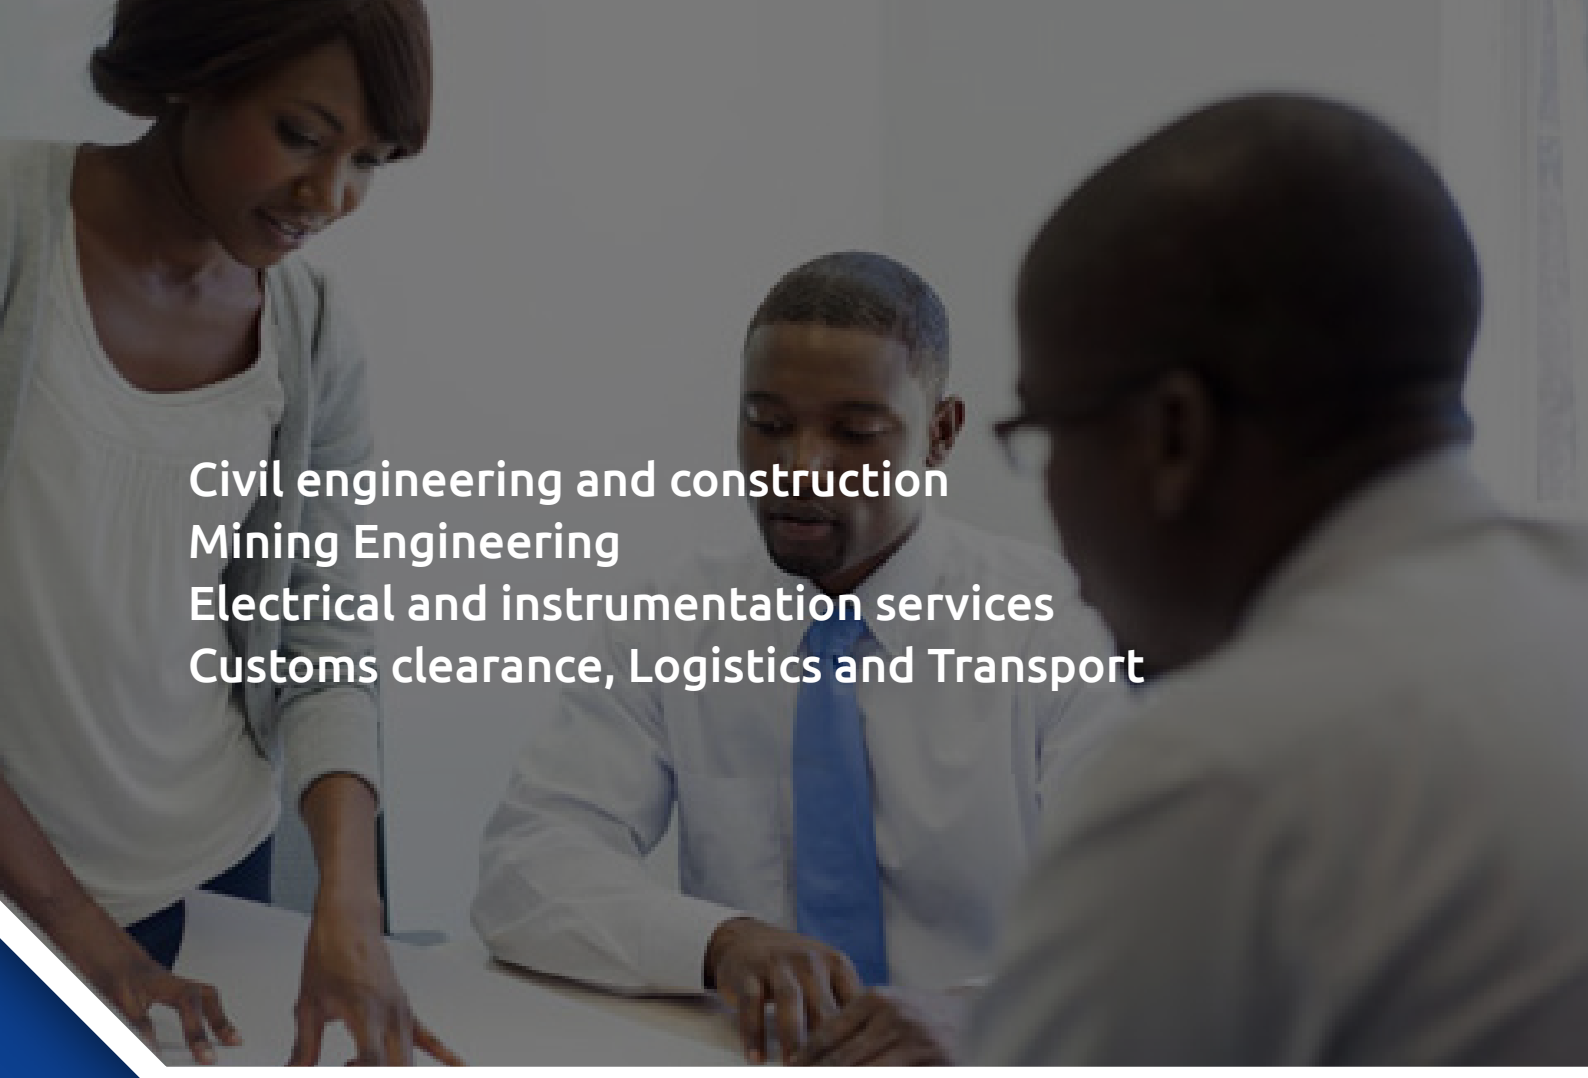

- **Installation, Repair, and maintenance of low and medium voltage**
- **Engine repair and rewinding**
- **Other factory maintenance services**

Customs clearance, Logistics and Transport

We support our partners in the export of mining industry (and industrial) products such as copper, cobalt and their concentrates. On import, ideal Industries SARL relieves you of cumbersome administrative procedures, and ensures the import of raw materials (Acid, Sulphur, Hot, etc.), goods and miscellaneous. A set of services combining quality and safety, respecting all the rules in force, is provided for the transport of minerals to the destinations indicated, but also from your person to the mining sites. We also support your supply chain by delivering several products (whether spare parts for construction equipment, engineering materials, or even lubricants).

- **Import/Export Service (Advice and Complete Management)**
- **Supply of engineering materials**
- **Supply of construction equipment spare parts**
- **Supply of fuel and lubricant**
- **Supply of geomembrane, geosynthetic and geotextile**
- **Transportation of personnel and minerals**
